

2015-2016 - Econ590 - Topics in Macroeconomics - Beaudry & Portier - Assignment 5

Estimating an RBC/NK Model With DYNARE

- ▶ Take the RBC/NK model you have written and solved for assignment 4.
- ▶ Choose a country and a set of data and estimated the model (Maximum Likelihood and/or Bayesian estimation)
- ▶ Then replicate the exercise with another set of data or another country or another period, and discuss the results (*example : estimate the model on UK data for 1960-1985 (high inflation) and 1990-2015 (low inflation)*)).
